Perminas M

AI TRAINER PORTFOLIO

Introduction

About me

- I'm an AI training and data annotation specialist with experience in RLHF, prompt evaluation, AI safety, transcription, and multilingual data labeling. Skilled in evaluating AI-generated content for quality, accuracy, and tone, I combine strong analytical and communication skills with a background in counseling psychology to support the development of safe and reliable AI systems. Proficient in English and Swahili language tasks, content moderation, and research documentation, I thrive in detail-oriented and fast-paced remote environments.

AI Training Experience

2021 ————— 2022 ————— 2023

Performed text and image labeling tasks while maintaining accuracy, consistency, and quality assurance standards for AI datasets.

Worked on English and Swahili transcription, content moderation, and data verification projects across remote AI platforms.

Evaluated AI-generated responses for tone, factual accuracy, relevance, and safety in RLHF-based projects.

AI Training Experience

2024 ————— 2025 ————— 2026

Supported multilingual annotation and prompt evaluation projects involving English and Swahili language tasks.

Contributed to AI alignment and safety-focused projects through response comparison, behavioral analysis, and research documentation.

Currently working on AI evaluation, prompt engineering, multilingual annotation, and quality assurance projects focused on improving safe and reliable AI systems.

PROJECTS

AI Research & Data Evaluation Dashboard *AI Training & Analytics Project*

In this project, I worked on developing and analyzing an AI research dashboard focused on data science workflows, model evaluation, and performance analytics. I organized and interpreted AI-related datasets, monitored key research metrics, and visualized insights through interactive charts and reports. This project enhanced my skills in AI analytics, data visualization, research evaluation, and problem-solving while supporting efficient and data-driven AI development processes.

PROJECTS

Retail Analytics & Inventory Insights Dashboard

In this project, I developed a data analytics dashboard focused on retail inventory tracking, sales performance monitoring, and operational insights. I worked with data visualization tools to analyze stock movement, product trends, and category performance while transforming complex datasets into clear and interactive reports. This project strengthened my skills in data analysis, dashboard design, and business intelligence by enabling data-driven decision-making through actionable insights.

PROJECTS

Computer Vision & AI Annotation Dashboard

In this project, I worked on AI research and data annotation tasks involving computer vision, conversational AI, and image segmentation workflows. I contributed to organizing training datasets, evaluating annotation quality, and monitoring AI model performance across multiple AI tasks such as object detection and image analysis. Through this project, I enhanced my skills in AI data evaluation, analytics, quality assurance, and workflow optimization while supporting the development of reliable and scalable AI systems.

PROJECTS

AI Training & Data Annotation Projects

In these projects, I worked on AI training and data annotation tasks involving image labeling, text classification, sentiment analysis, and data quality improvement. I used tools such as Label Studio, CVAT, and Excel to create accurate training datasets, review annotations, and support the development of reliable AI and machine learning models.

Educational Background

Science & Technology Studies

2016-2020

Focused on analytical research, data analysis, and technology-driven problem solving with growing experience in artificial intelligence, data annotation, and AI training workflows.

AI Foundations Certificate

Coursera 2023

Completed foundational training in artificial intelligence concepts, data analysis, machine learning basics, and AI workflow practices through online learning.

Personal Skills

Experienced in AI training, data evaluation, and research-based analysis with strong attention to detail and problem-solving skills. Skilled in annotation workflows, quality assurance, and analytical tasks that support accurate and reliable AI model development.
